PROFESSIONAL SUMMARY

Full Stack Developer with experience building government financial systems and enterprise platforms using Java Spring Boot, Go (Gin/GORM), Angular, and Oracle Database. Experienced as a mentor and facilitator for nationwide coding camps, and active in leading a software developer community on campus.

TECHNICAL SKILLS

Programming Languages: Java, Golang, C#, JavaScript, TypeScript, PHP

Frameworks & Libraries: Spring Boot, ASP.NET Core MVC, Angular 21, Go Gin, GORM, Entity Framework Core, React.js, Laravel, TailwindCSS, Chart.js

Database: Oracle Database, PostgreSQL, MySQL, SQLite

Tools & Platforms: Git, GitHub, GitLab, Vercel, Figma, Visual Studio Code, Visual Studio, DBeaver

Soft Skills: Teamwork, Communication, Adaptability, Problem Solving

WORK EXPERIENCE

Intern Full Stack Developer | Tabel Data Informatika — via Maganghub Kemnaker Batch 3 *Dec 2025 – Jun 2026 (6 Months)*

- Developed government financial system modules based on Java Spring Boot, Angular, and Oracle Database, covering reporting features and transaction data management during a 6-month internship program.
- Collaborated with cross-functional teams to translate business requirements into application features and completed tasks according to project priorities.

Facilitator | Coding Camp 2026 Powered by DBS Foundation – Vocational High School *Jan – Apr 2026 (4 Months)*

- Guided 25 vocational high school students through the Full-Stack Web Developer learning path for 4 months, ensuring every participant understood the curriculum and completed all modules on the Dicoding platform on time.
- Coordinated with instructors to monitor participant progress and provide periodic reminders for task completion.

Mentor Class | Coding Camp 2025 Powered by DBS Foundation – University *Jan – Jun 2025 (6 Months)*

- Guided 25 university students through the Full-Stack Web Developer learning path for 6 months, helping participants complete the Dicoding curriculum and providing periodic technical consultation.
- Monitored students' study progress and provided motivation and reminders for task completion so that all participants could complete the program on time.

Certified Independent Study Participant (SIB) | Dicoding x Kampus Merdeka — Cycle 5 *Jul – Dec 2023 (6 Months)*

- Participated in an intensive Front-End Web and Back-End track as a 5th-semester student, equivalent to 20 credit units (SKS) under the Merdeka Belajar Kampus Merdeka (MBKM) curriculum.
- Built a web-based capstone project as the program's final competency assessment.

PROJECTS

Inventory Management System | ASP.NET Core MVC (.NET 8), C#, Entity Framework Core, SQLite, Bootstrap 5

- Web-based inventory management application with a two-level approval workflow: Staff submit stock transactions → approved by Manager → final approval by Admin; stock changes only after Admin approval.
- Three-role role-based access control (Admin, Manager, Staff), automatic minimum stock alerts, stock report export to Excel (.xlsx) via ClosedXML, and an automatic seeder for roles, accounts, and dummy data.
- GitHub: <https://github.com/ivillop/inventory-ms>

KeloLa Keuangan | Personal Finance App — Go Gin, GORM, Angular 21, Chart.js, SQLite

- Full-stack personal finance app with JWT Auth: track income & expenses, manage categories (CRUD + emoji icons), set monthly budgets with progress bars & remaining budget indicators.
- Dashboard with 6-month trend charts (line chart) and spending by category (donut chart); monthly financial reports can be printed/exported to PDF directly from the browser using CSS @media print — no additional library required.
- GitHub: <https://github.com/ivillop/finance-app>

Real-time Monitoring & Analytics Dashboard | Spring Boot, Angular 21 Signals, WebSocket, STOMP, Chart.js, SQLite

- Starter project for financial transaction monitoring based on native WebSocket/STOMP (without SockJS); Spring Boot backend automatically generates dummy transactions every 4 seconds and broadcasts them to the Angular 21 frontend without manual polling.
- Frontend uses Angular Signals for UI reactivity; includes a live ticker, automatic anomaly alerts, a 30-day trend chart, category breakdown, auto-reconnect, and a live status indicator.
- GitHub: <https://github.com/ivillop/transaction-monitoring-realtime>

Toko Mini | E-Commerce App — Laravel 13, PHP, TailwindCSS, Blade, SQLite, Midtrans

- E-commerce application with a product catalog, session-based shopping cart, checkout integrated with Midtrans Snap (payment popup), automatic webhook for order status updates, and customer order history & details.
- Complete admin panel with a summary dashboard, product & category CRUD (including image upload), and role-based access control; built with no build step required — ready to run directly.
- GitHub: <https://github.com/ivillop/ecommerce-mini>

ORGANIZATIONAL EXPERIENCE

Head of Programming Division | Creative Student Association 2022 – 2024

- Led the programming division and designed regular coding learning programs for active organization members.
- Prepared learning materials and provided regular hands-on programming mentorship.

Member | Creative Student Association 2021 – 2022

- Actively participated in organizational activities and software development projects with fellow members.

EDUCATION

STMIK Mardira Indonesia | Informatics Engineering 2021 – 2025

GPA: 3.70 / 4.00

SMA Muhammadiyah 4 Margahayu 2017 – 2020

CERTIFICATIONS

- Internship Certificate — Kemnaker × Tabel Data Informatika, Full Stack Developer Batch 3 (Jun 2026)
- Certificate of Appreciation — Dicoding × DBS Foundation, Facilitator Coding Camp 2026 Vocational High School (May 2026)
- Certificate of Appreciation — Dicoding × DBS Foundation, Mentor Coding Camp 2025 University (Jul 2025)
- Certification of Completion (SIB) — Dicoding × Kampus Merdeka, Front-End Web & Back-End Batch 5 (Dec 2023)
